

## Applications

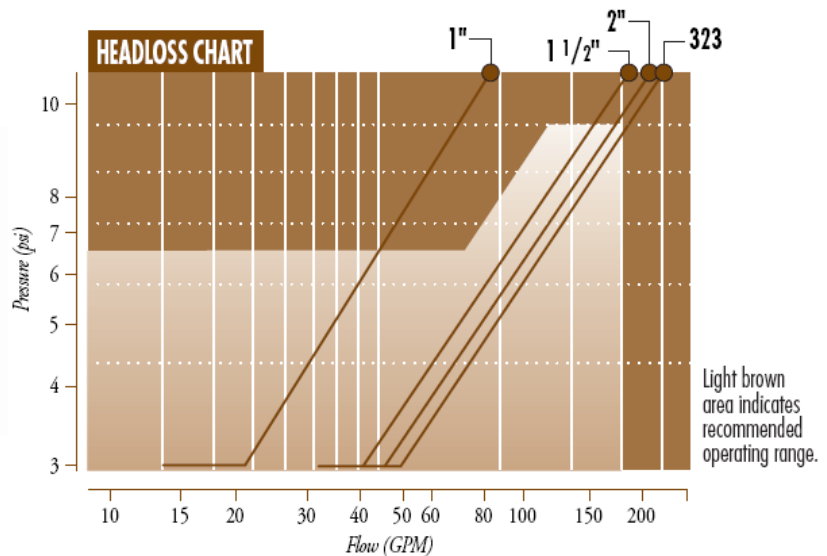

- Small agricultural irrigation zones.
- Greenhouse and nursery irrigation.
- Residential and light commercial Applications.
- Cooling systems.

## Features and Benefits

- Durable glass reinforced nylon construction - superb hydraulic performance.
- Large internal water passages for clog resistance.
- No moving parts in the flow path or control loop - no maintenance.
- Flow control (throttling) handle.
- Standard with built-in solenoid for ease of operation and reliability.
- Ideal for ultra high flow or low flow capacity irrigation systems.
- Simple to install - vertically or horizontally.
- High resistance to corrosive water containing fertilizers and chemicals.

MAXIMUM RECOMMENDED FLOW RATES (GPM)						
1"	1 1/2"	2"	323	3"	4"	6"
50	90	175	225	390	600	1300
